Blockchain Developer

Responsible and passionate professional focused to provide a quality of work. Keen interest in Blockchain and eager to learn more. Having strong knowledge of writing secure and optimized solidity smart contracts. Having working experience in Defi project and learned how the Defi market works. Familiarity with Rust based blockchains polkadot and solana. Eager to learn more and work with interesting people.

Skills

● Ethereum	● Truffle / Hardhat Framework	● JavaScript
● Solidity	● Web3.js	● Node.js
● Rust	● Hyperleger Fabric	● React

Experience

[JUNE 2022] – [FEBRUARY 2023]

Full Stack Blockchain Developer/CinemaDraft, LLC

- Deployed CD3D subgraph and generated the graph data to query the events and entities within the Binance Smart Chain and CD3DSwap ecosystem.
- It's a Defi project similar to Uniswap/Pancakeswap. Working on this project learned about the reflection smart contract, Liquidity providers, AMM etc.
- Worked on making the CD3D website to make it dynamic by getting the real data for the website.
- Worked on frontend to match the expectations of the designer on some parts of the site.

Education

Bachelor of Technology

Jabalpur Engineering College, Jabalpur

INFORMATION TECHNOLOGY [2018-2022]

12th class

Saraswati GyaanPeeth Higher Secondary School, Dewas, 84.2%

10th class
Govt. Higher Secondary School, Dabhaura 85%

Projects

Chat-GPT-Rust
- It is a Rust based command line AI project.
- GitHub Link - https://github.com/aiky967/Chat-GPT-Rust/tree/master

TikTok on Solana Blockchain / Solana, React
- Used Rust Program, Nextjs as a frontend management.
- Tiktok clone is a platform where people can connect their phantom wallet then watch and upload short videos like regular tiktok but in this data is stored on the blockchain so their is no problem of data being stolen and users have right to their private information.
- GitHub Link - https://github.com/aiky967/tiktok-solana
- Application Link - https://aiky-tiktok.netlify.app/

Online Store at Solana Blockchain / Web3 API, React
- Created a online store where users can connect their phantom wallet and buy GIFs using USDC. If user wants to create their own GIFs for the store, then user can do this as well.
- Used IPFS to store data, solana libraries to manage the log in.
- GitHub Link - https://github.com/aiky967/solana-pay
- Application Link - https://one-piece-store.vercel.app/

Liscence & Cetrifications

[MARCH 2023]
Hyperedger Fabric 2.x Network Design & Setup
- Learned how to manage and deploy hyperledger fabric network locally & on the cloud.
- Learned Configuration on fabric networks by the way of YAML configuration file.

[APRIL 2023]
The Complete guide on Hyperedger Fabric 2.x on Kubernetes
- Learned the management of hyperledger fabric network on kubernates.

Achievements and participations

- Got selected for Inspire award program 2013-14.
- Our team got selected for SIH 2022 program at college level.
